

HIGH-LEVEL SPECIALISED APPLICATION SUPPORT SERVICE IN HIGH-PERFORMANCE COMPUTING

DO YOU NEED HELP SCALING YOUR CODE?

EPICURE offers expert support to researchers, tailoring support for your research.

Meet our Support Services

Code Enabling and Scaling

Support for enabling and increase the scalability of user codes to EuroHPC supercomputers.

Performance Analysis

Performance analysis for HPC codes.

Benchmarking

Our service focuses on developing a benchmarking suite to evaluate the performance of EuroHPC machines.

Code Refactoring

This service involves restructuring or rewriting parts of an application code to improve its maintainability but without changing its function.

Code Optimization

Our service aims at improving the efficiency and performance of the software such that it consumes fewer resources.

WHO'S ELEGIBLE?

Having a **EuroHPC JU allocation** project is required.

Don't have one yet?

We can help you apply!

DURATION

From **3 to 12 months** for sustained improvements.

READY TO OPTIMISE?

Request support now:

You can **request EPICURE support!**

Do you need a EuroHPC allocation?

Check the **EuroHPC Access Calls!**
